HACC Statistical Profile: Darling Downs South West Region

Introduction

Data

The data in the reports are sourced from customised tables supplied by the Australian Bureau of Statistics (ABS) to specifications from Diversicare. These tables provide data for all usually resident males and females in Queensland. Tables 1 and 2 classify the population in five broad age groups; 0-44 years, 45-59 years, 60-69 years, 70-79 years and 80 years and over. The four customised tables are:

Table 1: Country of birth of persons by age by SLA

Table 2: Proficiency in spoken English by age by SLA

Table 3: Language spoken at home by CALDB persons by SLA

Table 4: Language spoken at home by CALDB persons, total Queensland.

The tables are large, covering 480 SLAs, a total of 280 birthplace countries, four levels of English language proficiency and 62 language groupings. Consequently, many of the cells are small or zero. The ABS is prohibited under the *Census and Statistics Act 1905* from providing information which could identify any particular individual or organisation. Therefore, introduced random error is used to ensure that no such data are released (*ABS, Census Dictionary 2006, Cat No 2901.0, p 200*).

For the 2006 Census, a new technique was developed to avoid identification of individuals. The confidentiality technique applied by the ABS is to slightly adjust all cells to prevent any identifiable data being exposed. These adjustments result in small introduced random errors. The technique allows very large tables, for which there is strong client demand, to be produced even though they contain numbers of very small cells.

Modifications are made to totals and subtotals to preserve additivity within tables. Tables which have been randomly adjusted will be internally consistent. However comparisons with other tables containing similar data may show minor discrepancies. This is the case for both customized tables and standard products. It is not possible to determine which individual figures have been affected by random error adjustments, but the small variance which may be associated with derived totals can, for the most part, be ignored.

HACC Statistical Profile: Darling Downs South West Region

In preparing detailed tables from data supplied by the ABS, PIFU has found that the randomisation of small cells may result in totals which are different for the same populations in different tables. For example, the CALDB population classified by birthplace in Table 1 (306,231 people) differs from the population classified by proficiency in spoken English in Table 6 (306,938 people). Totals may also vary within the same table if different geographies are summed, eg. total CALDB population in Queensland derived from the sum of SLAs may be different from the sum derived from Statistical Divisions (SDs).

Culturally and linguistically diverse backgrounds

The key target group for this project is people of cultural and linguistically diverse backgrounds (CALDB). This group included people from all birthplaces except English-speaking countries such as Australia, New Zealand, United Kingdom, Canada, USA and South Africa. A full listing of countries excluded is in Appendix A. Data for tables relating to birthplace are taken from Table 1 of the four customised tables.

Data from customised Table 3 are used for tables relating to the languages spoken by people who speak a language other than English at home. These people are further classified according to their self-assessment of proficiency in English. Overseas visitors are excluded throughout.

Summary

Population distribution

The Darling Downs South West HACC Planning Region had a population of 254,170 people at the 2006 Census, making it the second smallest HACC Region in Queensland (Table 1). The Region contained 9,173 people identified as being of culturally and linguistically diverse backgrounds (CALDB). This was 3.6% of the total population of the region, much lower than the Queensland average of 7.9%.

At the 2006 Census, there were 4,932 CALDB people aged 0-44 years, 2,005 people aged 45-59 years, 1,086 people aged 60-69 years, 777 people aged 70-79 years, and 373 people aged 80 years and over. These people made up 3.2%, 4.0%, 4.6%, 4.9%, and 4.0% respectively of

HACC Statistical Profile: Darling Downs South West Region

the total CALDB population in each age group in the Darling Downs South West Region. The proportions for all age groups were below the Queensland averages of 6.5% (0-44 years), 9.9% (45-59 years), 10.4% (60-69 years), 11.1% (70-79 years), and 9.6% (80 years and older).

Of the Statistical Local Areas (SLAs) in the Darling Downs South West Region, Toowoomba City – South-East had by far the largest CALDB population, a total of 2,173 people (Table 2). Almost three quarters (73.7%) of the CALDB population in this SLA were in the youngest age group (0-44 years). Toowoomba City – West had the second largest population (894 people) followed by Stanthorpe Shire (768 people), Toowoomba City – Central (724 people), and Gatton Shire (703 people). The remaining SLAs had CALDB populations of fewer than 550 people. Toowoomba City – South-East had the largest portion of its CALDB population born in China – excluding SARs and Taiwan Province (186 people); in Toowoomba City – West the largest share of its population was born in Sudan (183 people); Stanthorpe Shire had 321 people born in Italy; in Toowoomba City – Central 98 people were born in Sudan; and Gatton Shire had 65 people born in Philippines.

Stanthorpe Shire had the largest CALDB population (193 people) in the 60-69 years age group, followed by Toowoomba (C) – South East (110 people or 5.1%). One third of the SLAs in the Darling Downs South West Region had proportions of CALDB population aged 60-69 years greater than 5% (Table 3). The highest proportion was 14.9% in Stanthorpe Shire, followed by Rosalie Shire - Part A (8.9%) and Quilpie Shire (7.1%).

In the Darling Downs South West Region in the 70-79 years age group, there were 14 SLAs with proportions of CALDB population greater than 5%. Stanthorpe Shire had by far the highest number (160) and proportion (20.8%), followed by Toowoomba City – South East (81 people and 4.8%) and Toowoomba City – West (57 people and 3.5%).

In the oldest age group (80 years and older) Stanthorpe Shire had the largest number (106) and proportion (21.8%) of CALDB people, closely followed by Toowoomba City – South East (59 people). Fourteen SLAs in this age group had no CALDB population (compared to six SLAs in the 70-79 years group, and three SLAs within the 60-69 years category).

HACC Statistical Profile: Darling Downs South West Region

English proficiency

There were 2,361 people in the Darling Downs Region who spoke a language other than English at home and spoke English very well (Table 4), and 1,873 people spoke English well. There were 785 people who did not speak English well and 153 people who did not speak English at all.

Birthplaces

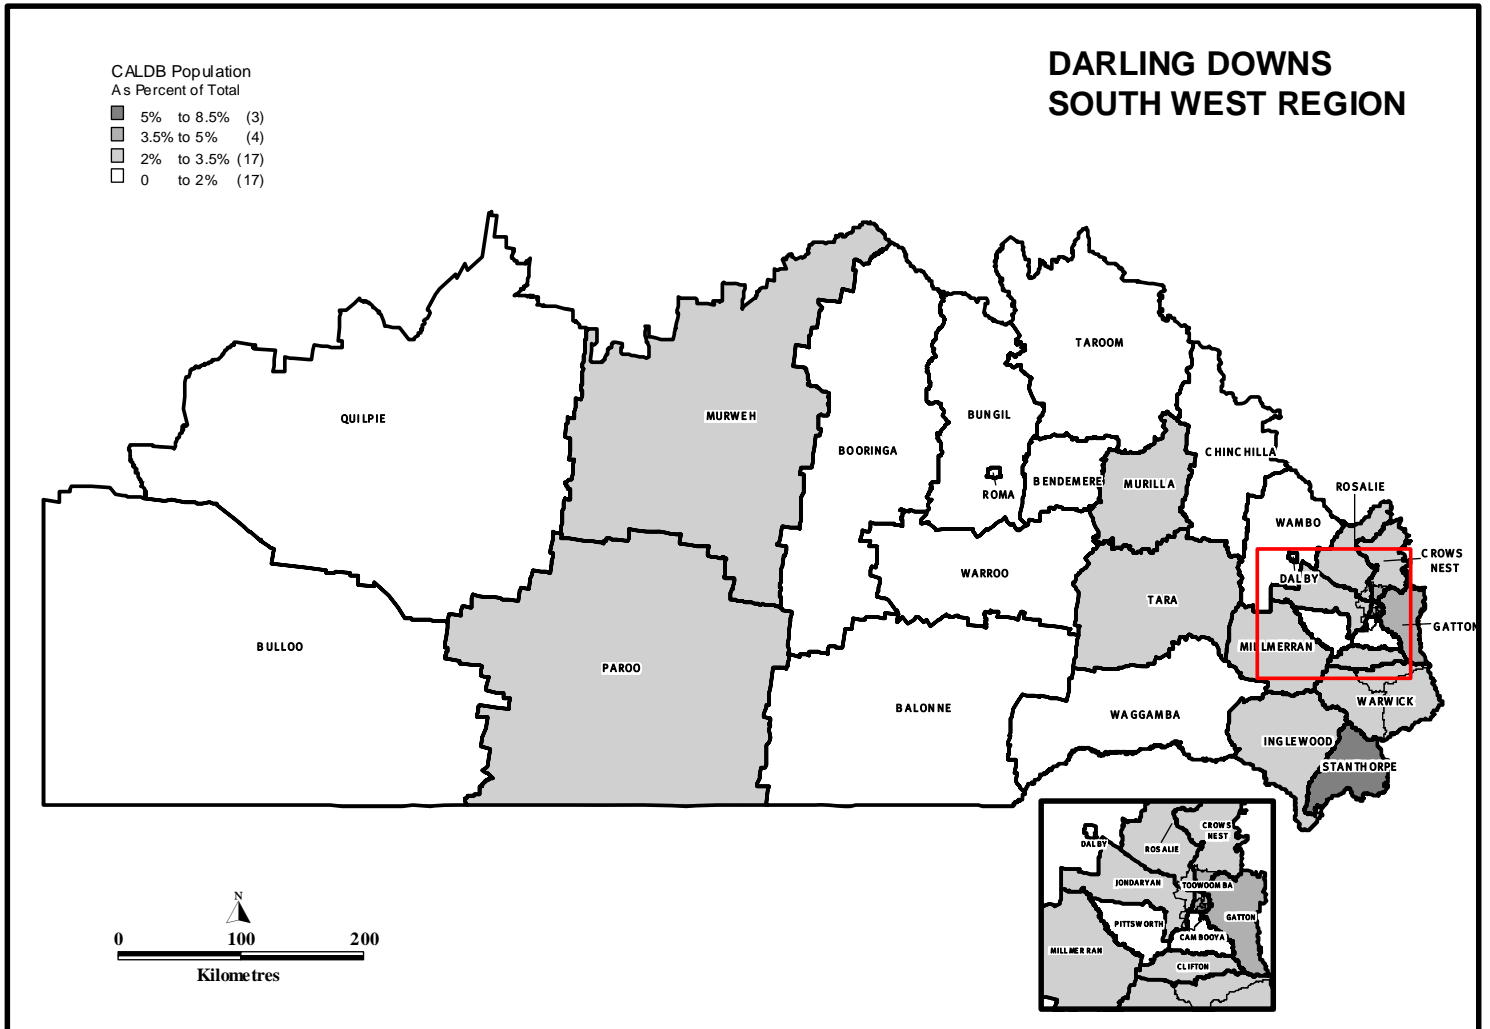

The top five CALDB birthplaces in the Darling Downs South West Region for people aged less than 60 years were Philippines (574 people), Zimbabwe (523 people), Sudan (455 people), Papua New Guinea (448 people), and Germany (363 people). The top five CALDB birthplaces in the Darling Downs South West Region for people aged 60-69 years were Germany (189 people), Netherlands (175 people), Italy (116 people), Croatia (51 people), and Philippines (33 people).

In the Darling Downs South West Region, the top five CALDB birthplaces for the 70-79 years age group were Italy (155 people), Netherlands (136 people), Germany (119 people), Croatia (26 people), and Hungary (21 people). Within the oldest age group (80 years and older), the top five CALDB birthplaces for the Darling Downs South West Region were Italy (96 people), Netherlands (58 people), Poland (39 people), Germany (29 people), and Indonesia (14 people).

Table 5 contains information on the CALDB birthplaces of people in each of the SLAs in the Darling Downs South West Region. Records are not shown for countries with a total of three or fewer people, the number of birthplaces with 0-3 persons by age groups are shown at the bottom of each table. However, the totals for each SLA include all CALDB countries (refer to Appendix A for birthplace countries excluded).
